

Radio Tower Bid #23033 RFI Questions – ADDENDUM 3-7-23

- 1.) 4.2: is this part of the tower contractors responsibility. If so, please provide details or drawings. **This section contains general practices applicable to the tower contractor if provided as part of their work.**
- 2.) 4.22: Is this part of the tower contractors responsibility. If so, please provide details or drawings. **Not applicable, provided by others.**
- 3.) 5.10: As part of this bid do we include FAA tower lighting? **Yes, if required by FAA. A preliminary study indicated FAA lighting is not required. Please note the Tower Contractor is required to perform their own due diligence on FAA lighting requirement.**
- 4.) 5.10.h.: Where would the 66 block be located please provide details and drawings? **5.10.H: If applicable, the 66 Block will be in the Building Server Room. See the response on 5.10 for FAA Lighting requirement.**
- 5.) 6.1: Per section 5.13 it states all conduits for RF electrical etc. be installed by the electrical contractor. Please clarify. **Not applicable, provided by others. Section 6.1: The entry port for the Auxcomm Tower is provided and installed by others.**
- 6.) 6.2: Please provide details and drawings. **Not applicable, provided by others.**
- 7.) 6.4: Is it the tower contractor responsibility to install the entry ports in the newly built building please provide details and drawings. **Not applicable, the entry ports are provided by others. Not applicable, provided by others.**
- 8.) 7.a. What installations should be coordinated as this RFP states everything to be installed on the tower is to be completed by others. **The antenna, antenna mounts, and cabling will be supplied and installed by other. The Auxcomm tower, however, requires the Tower Contractor to provide and install the center mast and the associated equipment including the provisions for the bypass grounding kit (RFB 4.23, items 5 through 6).**
  - b. Please provide details of exactly what is required. I believe this is part of the radio system that is not part of this bid. **Not applicable, provided by others.**
  - c. Please provide more detail related to what is required for the proposed radio equipment. Is this the tower contractor's responsibility? **Not applicable, provided by others.**
- 9.) 8.a Please clarify what exactly this means as this RFP references new towers and not electrical and mechanical systems. **Not applicable, the facility electrical and mechanical systems are provided by others. The tower contractor, however, is responsible for verification testing of the equipment installed as part of their proposal such as the rotating center mast for the Auxcomm tower.**
